Parent Feedback Needed

At the end of last year, we did surveys. However, we never received the percentage of completed surveys needed to meet our NAC accreditation requirement. Therefore, we would like to roll out these surveys next week. Even if you filled out a survey last year, we would like to have all parents complete this short survey sometime by Friday the 23rd. These surveys are required of us and also help us improve our programming. We can give feedback directly back to the classrooms and improve our procedures based on parent comments. Likewise, we can also know better what we are doing that parents like!

Any parent that fills out a survey will receive a cute solar-powered flower pot. In addition, they can also put their name into a raffle for a fun children's themed basket. We will have a table at the front beginning on Monday! Thanks for your help!

Thank You

Our little bake sale was a success. The classrooms loved making special treats and we raised money for a fun summer surprise. We will be purchasing a fancy bubble making machine for all the rooms to enjoy! Thank you for your support, a special thank you to Jude & Krian's mom for making beautiful cupcakes for the sale. They were a hit!

Field Trips

Parents in Room 7, be sure to have your child on time for field trip days so they are not left behind! Also, as you are aware, there is a \$95 summer activity fee for our Room 7 children. If you have not yet done so, please let Kris know if you would like to pay that fee in one payment or in multiple installments. Otherwise, she will be charging it in one payment.

Vision Screening Correction

We found out that Elliott Vision Center in Racine will be coming to Growing Green for free vision screenings! This will be very convenient. As soon as we have the specific dates, we will let all our families know. Please ask Erin if you have any questions about this opportunity!

Classroom Highlights

We had our first days of water play this week! The weather was perfect for us both days. During water play children are learning many skills, in addition to just having a blast! Some of their learning includes:

- ✓ Measuring with cups in the water tables and using math words like more, less, full, and empty
- ✓ Observing the element of water as they pump water in the water trough
- ✓ Using all their muscles and coordination skills as they run through the sprinklers
- ✓ Developing their understanding of scientific concepts like temperature and evaporation
